

I am 蔡國隆, born in 1971. I am male. I am 5 feet and 6 inches tall. I weight 143 pounds. I have graduated from National Yunlin University of Science and Technology, majoring in Department of Industrial Management. My minor subject is 資工.

I can adjust myself to the new job easily. That is, I am able to learn the new skills quickly in the new company and communicate with the coworkers without problems. In addition, I like challenges and I am ready to face them. I always give top priority to the quality of my tasks. Pressure would not affect my enthusiasm about work because I know the way of changing pressure into the power that could arouse me. In a word, I have a strong confidence that I can work well under pressure.

I like working with the computer considered a very useful tool. I can find the information I need on the Internet. I am very interested in a variety of performance, such as plays, operas, and movies. Appealing stories is always able to increase my imagination and creativity. Besides, watching movies written in foreign languages can let me have more opportunities to learn foreign languages and cultures. Many people get addicted to games, but I don't because I can control myself without difficulty. The computer just my helper. I enjoy playing games because the activity can make me become smarter and relieve my pressure. Playing online games can make me contact with people from different places.

Here are some computer skills that I am capable of. I am good at the computer in three aspects. They are papaerwork, programming, and designing.

As for paperwork, I am proficient in excellent writing projects and electronic spreadsheet with Excel and making up webpages with FrontPage.

With regard to programming, I am great at Visual Basic and I am also familiar with Database system such as MS SQL. I have had several experiences of playing a part in the project. The most advantageous and obvious point of my computer ability is System Analysis.

On the subject of visual arts, the preeminence of mine are PhotoShop, CorelDraw, Illustrator and AutoCAD and Director, After Effects, Premiere .

In order to become more experienced, I am longing to put what I've learned into practice instead of sitting at home. Besides, it's my short-term goal to get certificates relating with what I am going to do as possible as I can. Moreover, for the purpose of keeping improving myself, I need to assimilate more knowledge and absorb myself in professional skills. By doing so, I can make efforts and contribute to the company.

I will annreciate if I can be oiven an onnortunity of an interview. Thanks for your consideration.

My name is 蔡國隆, born in 1971. I am male. I am 5 feet and 6 inches tall. I weight 143 pounds. I will graduate from YuanZeUniversity, majoring in 資工所. My minor subject is 資訊管理.

Well-organized and good at the communication skill, I like the way of working logically. Besides, I like challenges and hold on to all opportunities of growing skillful and professional. I always give top priority to the quality of my tasks. Pressure would not affect my enthusiasm about work because I know the way of changing pressure into the power that could arouse me. In a word, I have a strong confidence that I can work well under pressure.

I like working with the computer considered a very useful tool. I can find the information I need on the Internet.

Allow me to briefly introduce the computer skills which I have. I am good at the computer in three aspects. They are papaerwork, programming, and designing.

As for paperwork, I am proficient in computer typesetting with Word and electronic spreadsheet with Excel and making up webpages with FrontPage.

With regard to programming, I am great at Visual Basic and I am also familiar with Database system such as MS SQL. I have had several experiences of playing a part in the project. The most advantageous and obvious point of my computer ability is System Analysis.

On the subject of visual arts, the preeminence of mine are PhotoImpact and PhotoShop, CorelDraw, Illustrator and AutoCAD.

In order to become more experienced, I am longing to put what I've learned into practice instead of sitting at home. Besides, it's my short-term goal to get certificates relating with what I am going to do as possible as I can. Moreover, for the purpose of keeping improving myself, I need to assimilate more knowledge and absorb myself in professional skills. By doing so, I can make efforts and contribute to the company.
